 Powis paper based binding has a low environmental impact versus plastic comb and coil binding

Papers and composition materials are FSC (Forest Stewardship Council) certified and contain 30% recycled and/or post-consumer waste content

Papers bound with Fastback bindings are fully recyclable — same as for magazines and paperback books.

POWIS | fastback® 20

Unleash the full power with complementary products

FASTBACK® 20

The Fastback 20 features one-touch binding. Simply put the strip and book block in the binding machine and press the green button. The user-friendly interface makes binding as easy as 1-2-3.

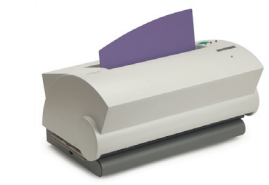

FOILFAST™ PRINTER

The revolutionary Foilfast Printer is the perfect addition to any office, studio or photolab, letting you add stunning foil artwork and titles to your document or photobook covers. This 600 dpi printer will feed multiple pages, and is designed to work perfectly with the Foilfast Title sheets, comp and clear covers.

POWISPRINTER™

The PowisPrinter lets you add dazzling foil titles to the spines of your books. If you are tape binding documents, the PowisPrinter is the perfect addition to your office. When a document is on the shelf, its spine becomes its most important asset.

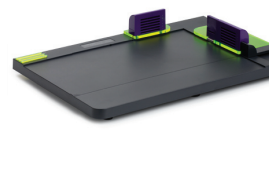

FASTBACK® SPLITTER™

The Fastback® Splitter makes it possible to bind coated paper without the mess and expense of milling or notching equipment. Microblades cut tiny channels into the center of each sheet of paper, allowing the adhesive to be absorbed by more paper fibers than ordinary edge binding will allow.

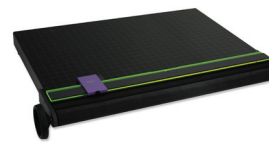

SCORING MACHINE

The Scoring Machine can score card stock up to 20 points thick (.020" or .50mm). The patented Centering Guide eliminates any guesswork as to where to place the scores. Place the softcover between the Book Thickness Rings and adjust the width to match. The Scoring Machine is now ready to produce perfect scores every time.

FASTBACK® HARDCOVER GUIDE

The Fastback Hardcover Guide lets anyone make a professional-quality hard cover photobook in just seconds. With the Fastback Hardcovers, assembly is simple. The Fastback Hardcovers are designed with adhesive built in, eliminating messy glue pots.

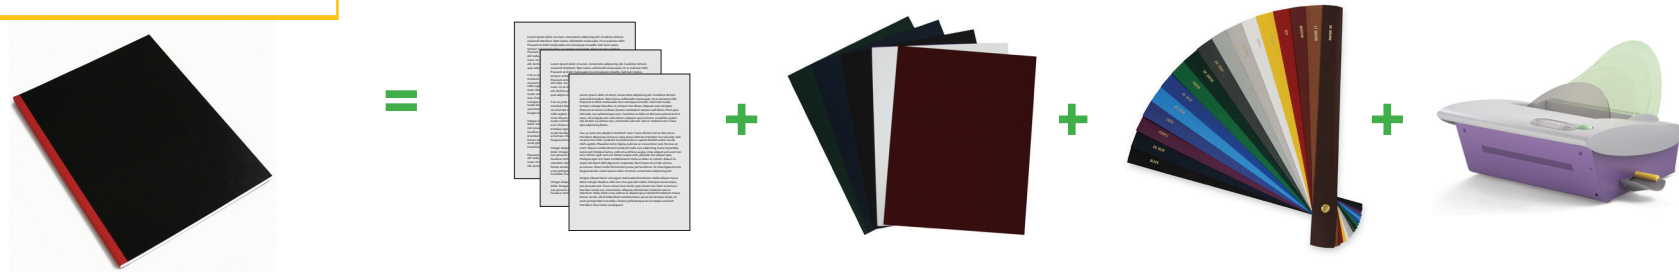

POWIS IMAGE WRAPPER™

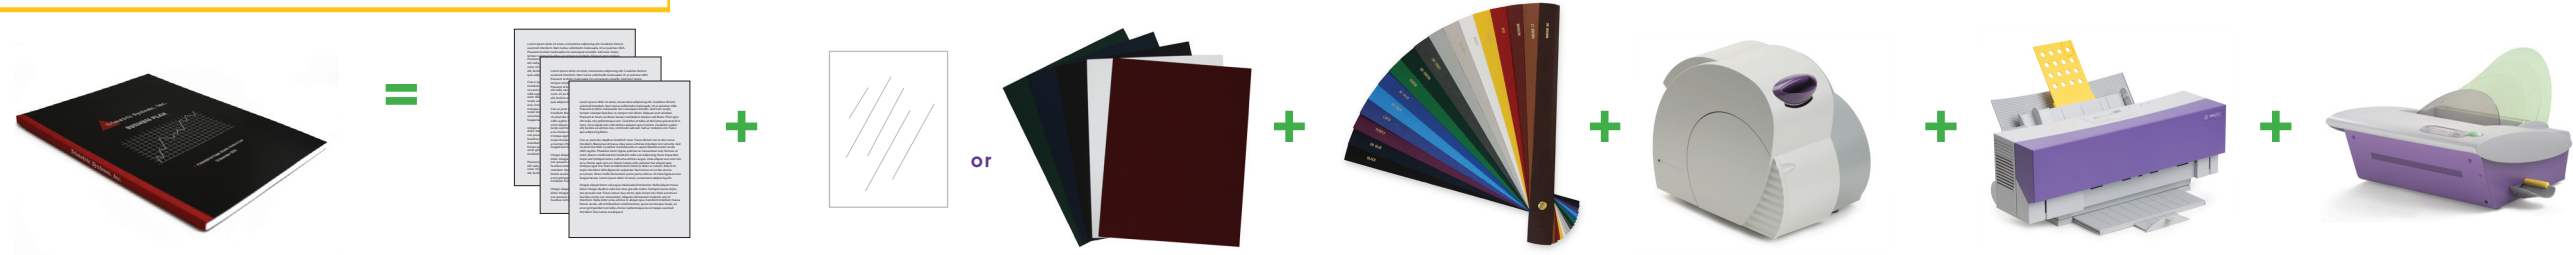

With the Image Wrapper you can make custom hard covers, quickly and easily, one at a time, in any office environment. The Image Wrapper uses the Powis ImageBack™ Hardcovers and ImageBack™ Liners. Each cover comes with the adhesive already applied, so you never have to worry about messy glue application, leakage, glue build-up, or cleaning.
